Please add as first sentence of the specification: This is a continuation of application 10/081,473, filed February 22, 2002 and now U.S. Patent No. 6,726,968.

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or suggest the recited food package comprising a container having an open portion and a multi-layered film sealing the open portion. Independent claims 38 and 42 identify the uniquely distinct features of a multi-layered film, containing a nylon film, sealant film with an anti-fog composition and a protective film, where the protective film that is positioned away from the open portion of a container in combination with a container having an open portion. The closest prior art, Hatley et al. (USPN 6,447,892), disclose a multi-layer film that may be rolled, which either singularly or in combination, fail to anticipate or render obvious the above limitations. A terminal disclaimer
